

SMART INDIA HACKATHON 2026

- **Problem Statement ID** - 26190
- **Problem Statement Title** - Secure Digital Document Management System For Legal and Investigation Documents
- **Theme** - Blockchain & Cybersecurity
- **PS Category** - Software
- **Team ID** -
- **Team Name** - Tech Defender

Problem

Difficulty in locating documents quickly

Solution

AI-powered smart search with auto-tagging and filters (Case ID, Document Type, Date Range)

Problem

Unauthorized access to confidential information

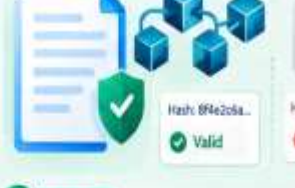

Solution

Role-Based Access Control (RBAC) + Multi-Factor Authentication (Biometric + OTP + Password)

Problem

Document tampering risks

Solution

Blockchain-based hash verification - any change = invalid document

Problem

Delays in legal and investigative processes

Solution

Centralized system + AI search + instant access → faster case resolution

Problem

Poor auditability and compliance tracking

Solution

Immutable blockchain audit log - every action logged forever

Problem

Fragmented digital storage / paper-based systems

Solution

Cloud-based centralized document storage with encryption

Problem

Lack of version control

Solution

Complete version history with audit trail - all versions stored, can revert

Problem

Inefficient collaboration between departments

Solution

Secure document sharing with expiry dates and permission control (View/Edit)

Problem

Police assets not tracked

Solution

Asset lifecycle management (Purchase → Allocate → Use → Transfer → Maintenance → Disposal) with QR/RFD

Problem

Lack of legal validity and evidentiary integrity

Solution

Digital Signatures + Blockchain verification + Tamper-proof storage

TECHNICAL APPROACH

TECHNICAL

✓ HIGH

- React
- Django 4.2
- REST APIs
- WebAuthn API

ECONOMIC

✓ HIGH

- Cloud-native
- Open-Source
- Pay-as-scale

OPERATIONAL

✓ HIGH

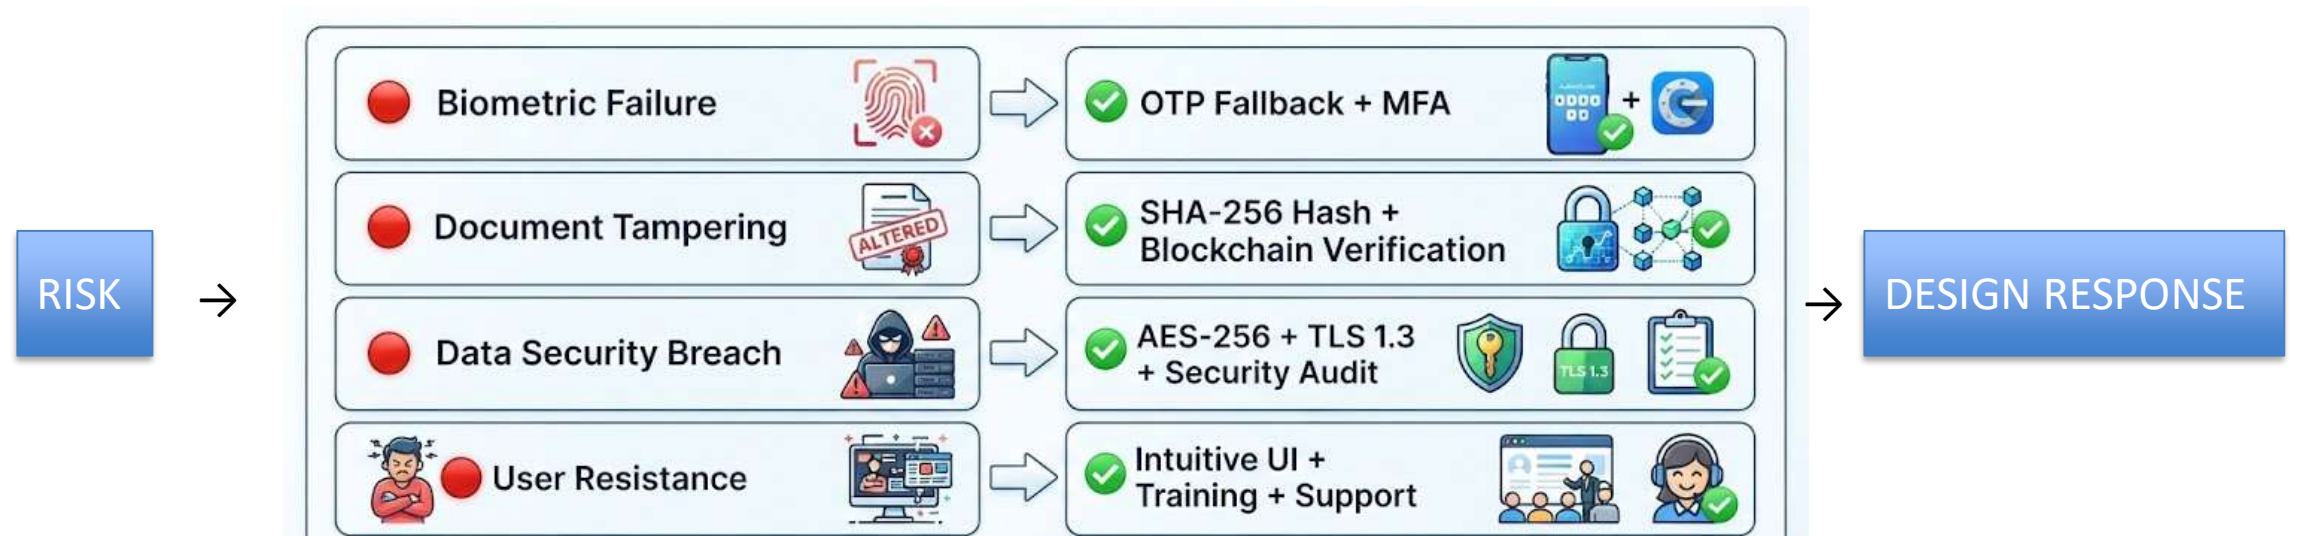

- Simple UI
- Role-based
- Minimal Training

COMPLIANCE

✓ HIGH

- NCRB-aligned
- AES-256
- IT Act Compliant

FEASIBILITY

IMPACT AND BENEFITS

IMPACT

Police & Investigating Officers

Faster document retrieval

NCRB / Government Departments

Centralized & controlled records

Investigative & Legal Teams

Quicker case processing

Administrators

Better security & audit visibility

BENEFITS

Faster

Instant access +
AI Search

Secure

Encryption +
Blockchain Verification

Economic

Lower paper &
storage costs

Environmental

Reduced paper
consumption

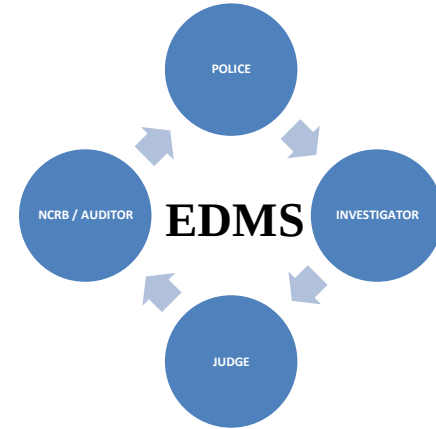

Efficient

Automated workflows
& tracking

Transparent

Complete audit trail

“From Paper-Heavy Processes → Secure, Smart & Sustainable Digital Governance”

SOLUTIONS ALREADY EXIST MISSING FETURES

Document management system, Document management system, Document verification, Evidence integrity

NAME : NCRB Reports, CCTNS, ICJS, e-Courts

eDMS PROVIDES

Centralized DMS, ✓ RBAC + Blockchain, ✓ SHA-256 + Blockchain, ✓ Tamper-proof storage
